Cobra s600/s800 Robot System Wellness Visit

The Cobra s600/s800 Robot System Wellness visit is a complete preventive maintenance service for your robotic system. During the one day visit, an Omron certified Field Service Engineer will perform all recommended factory maintenance activities and complete a comprehensive inspection of your robot. At the completion of the inspection, you will be given a report that documents the details of the service along with a list of any recommended repairs or services required to maintain your robot.

The Wellness visit saves you money by finding concerns early that can be corrected before more expensive damage is done. It also provides you confidence that your system is well maintained and reduces the risk of unplanned production downtime.
