Smart Laser Sensors Ideal for Long Range or Pinpoint Presence/Absence Sensing

- Ideal for applications that cannot be solved with a standard photoelectric sensor and are out of the sensing range of a fiber optic sensor.
- A wide variety of easy-to-use Laser Photoelectric Sensor Heads.
  - Coaxial Retro-reflective Models (E3NC-LH03).
  - Long-distance, variable spot, Diffuse-reflective Models (E3NC-LH02).
  - Small-spot (0.1 mm dia.), Limited-reflective Models (E3NC-LH01).
  - CMOS Reflective Models (E3NC-SH series).
- Smart Tuning to achieve stable detection with easy setup.
- White on black display characters for high visibility.
- Robot cables for reliable operation in harsh environments.

Features

Retro-reflective Models: E3NC-LH03
- Maximum sensing distance of 8 m.
- Stable detection of many types of workpieces.
- Stable detection of highly transparent films.

CMOS Laser, Reflective Models: E3NC-SH250H/SH250/SH100
- Stable detection even for varying workpiece colors and materials.
- Stable detection for inclined Head installation and varying workpiece shapes.

Diffuse-reflective Models: E3NC-LH02
- Long-distance detection at up to 1.2 m.
- Spot can be adjusted to the workpiece or application.

Amplifier Units
- Same shape as Fiber Amplifier Units plus easy operation.
- Smart Tuning with one button.
## Ordering Information

### Sensor Heads: E3NC-L Compact Laser Sensor Series  *(Dimensions → page 17)*

### Differential distance*4
10% of sensing distance max.

### Indicators
OUT indicator (orange) and STABILITY indicator (green)

### Ambient illumination (Receiver side)
Incandescent lamp: 10,000 lx max., Sunlight: 20,000 lx max.

### Ambient temperature range
Operating: –10 to 55°C; Storage: –25 to 70°C (with no icing or condensation)

### Ambient humidity range
Operating and storage: 35% to 85% (with no condensation)

### Altitude
2,000 m max.

### Installation environment
Pollution degree 3 (as per IEC 60947-1)

### Insulation resistance
20 MΩ min. (at 500 VDC)

### Dielectric strength
1,000 VAC at 50/60 Hz for 1 min

### Vibration resistance (destruction)
10 to 55 Hz with a 1.5-mm double amplitude or 100 m/s² for 2 hours each in X, Y, and Z directions

### Shock resistance (destruction)
500 m/s² for 3 times each in X, Y, and Z directions

### Degree of protection
IEC IP67*5, IEC IP65 (E3NC-LH02: Applies only when adjuster is locked.)*5

### Connecting method
Pre-wired connector (standard length: 2 m)

### Weight (packed state/Sensor Head only)

| Models with 2-m cable | Approx. 120 g/approx. 70 g | Approx. 115 g/approx. 65 g |
| Models with 5-m cable | Approx. 180 g/approx. 130 g | Approx. 175 g/approx. 125 g |

### Accessories
Instruction Manual

---

*1. These Sensors excluding the E3NC-LH03 are classified as Class 1 laser devices under IEC 60825-1 and the regulations of Laser Notice No. 50 for FDA certification. CDRH (Center for Devices and Radiological Health) registration has been completed. (Accession Number: 1220690).

*2. The values were measured using the OMRON standard sensing object (white paper) for the E3NC-LH01, E3NC-LH02, and E3NC-LH02 + E39-P52. The values for the E3NC-LH03, and E3NC-LH03 + E39-P51 apply when an E39-R21, E39-R22, E39-RS10, or E39-RS11 Reflector is used. Other Reflectors are not recommended.

*3. Defined at the 1/e² (13.5%) of the central intensity at the measurement distance. Measurement may be influenced if there is light leakage outside the defined region and the surroundings of the target object have a high reflectance in comparison to the target object.

*4. Measured at the rated sensing distance.

*5. The E39-P5 contains a packing to prevent entry of foreign matter. The degree of protection between the E3NC-LH03 and E39-P5 is not specified.

</tbody>
</table>

\(^1\) Two sensor outputs are allocated in the programmable logic controller PLC I/O table.

\(^2\) PLC operation via Communications Unit enables reading detected values and changing settings.

\(^3\) Applicable Sensor Head is the series of E3NC-LH series (Input/Opt 10-30V DC Class 2).

\(^4\) At Power Supply Voltage of 10 to 30 VDC. Normal mode: 1,650 mW max. (Current consumption: 55 mA max.) Eco ON: 1,410 mW max. (Current consumption: 47 mA max.) Eco LO: 1,350 mW max. (Current consumption: 51 mA max.)

\(^5\) The following details apply to the input.

\(^6\) The total for both outputs of a model with 2 outputs is 100 mA max. (Residual voltage: Load current of less than 10 mA: 1 V max., Load current of 10 to 100 mA: 2 V max.).

\(^7\) For Amplifier Units manufactured in July 2014 or later.

\(^8\) When connected to an OMRON NJ-series Controller.

\(^9\) The bank is not reset by the user reset function or saved by the user save function.

\(^*\) Eco LO is supported for Amplifier Units manufactured in July 2014 or later.

Note: Incorrect detection may occur outside the measurement range if the object has a high reflection factor.

*1. These Sensors are classified as Class 1 laser devices under IEC 60825-1 and the regulations of Laser Notice No. 50 for FDA certification. CDRH (Center for Devices and Radiological Health) registration has been completed. (Accession Number: 1220691)

*2. The values were measured at the center of the sensing distance using OMRON’s standard sensing object (white ceramic).

*3. Beam size: Defined at the 1/e 2 (13.5%) of the central intensity at the measurement center distance. Measurement may be influenced if there is light leakage outside the defined region and the surroundings of the target object have a high reflectance in comparison to the target object.

Also, when detecting a workpiece that is smaller than the beam size, a correct value may not be obtained.

*Note: The diagrams show the operation of the E3NC series sensors in both NPN and PNP output configurations. The L/D indicators and output circuits are depicted for Light-ON and Dark-ON modes.*
Nomenclature

Compact Laser Sensors

**E3NC-SA21/SA51/SA0**

- [LD Indicator] Indicates the setting status: Light-ON (L) or Dark-ON (D).
- [OUT1 Indicator] Turns ON when OUT1 is ON.
- [OUT2 Indicator] Turns ON when OUT2 is ON.
- [MODE Button] Used to switch between Detection Mode and Setting Mode.
- [ZERO Indicator] Turns ON when a zero reset is set.
- [ST Indicator] Turns ON when Smart Tuning is in progress.
- [L/D Indicator] Turns ON when Light-ON (L) or Dark-ON (D).
- [Tight Button] Executes Smart Tuning.
- [ZERO Indicator] Turns ON when a zero reset is set.
- [ST Indicator] Turns ON when Smart Tuning is in progress.
- [L/D Indicator] Turns ON when Light-ON (L) or Dark-ON (D).
- [Tight Button] Executes Smart Tuning.

**E3NC-LA21/LA51/LA0**

- [LD Indicator] Indicates the setting status: Light-ON (L) or Dark-ON (D).
- [OUT1 Indicator] Turns ON when OUT1 is ON.
- [OUT2 Indicator] Turns ON when OUT2 is ON.
- [MODE Button] Used to switch between Detection Mode and Setting Mode.
- [ZERO Indicator] Turns ON when a zero reset is set.
- [ST Indicator] Turns ON when Smart Tuning is in progress.
- [L/D Indicator] Turns ON when Light-ON (L) or Dark-ON (D).
- [Tight Button] Executes Smart Tuning.
- [ZERO Indicator] Turns ON when a zero reset is set.
- [ST Indicator] Turns ON when Smart Tuning is in progress.
- [L/D Indicator] Turns ON when Light-ON (L) or Dark-ON (D).
- [Tight Button] Executes Smart Tuning.

Ultra-compact CMOS Laser Sensors

**E3NC-SA21/SA51/SA0**

- [LD Indicator] Indicates the setting status: Light-ON (L) or Dark-ON (D).
- [OUT1 Indicator] Turns ON when OUT1 is ON.
- [OUT2 Indicator] Turns ON when OUT2 is ON.
- [MODE Button] Used to switch between Detection Mode and Setting Mode.
- [ZERO Indicator] Turns ON when a zero reset is set.
- [ST Indicator] Turns ON when Smart Tuning is in progress.
- [L/D Indicator] Turns ON when Light-ON (L) or Dark-ON (D).
- [Tight Button] Executes Smart Tuning.
- [ZERO Indicator] Turns ON when a zero reset is set.
- [ST Indicator] Turns ON when Smart Tuning is in progress.
- [L/D Indicator] Turns ON when Light-ON (L) or Dark-ON (D).
- [Tight Button] Executes Smart Tuning.

**E3NC-SA7/SA9/SA24/SA54**

- [LD Indicator] Indicates the setting status: Light-ON (L) or Dark-ON (D).
- [OUT1 Indicator] Turns ON when OUT1 is ON.
- [OUT2 Indicator] Turns ON when OUT2 is ON.
- [MODE Button] Used to switch between Detection Mode and Setting Mode.
- [ZERO Indicator] Turns ON when a zero reset is set.
- [ST Indicator] Turns ON when Smart Tuning is in progress.
- [L/D Indicator] Turns ON when Light-ON (L) or Dark-ON (D).
- [Tight Button] Executes Smart Tuning.
- [ZERO Indicator] Turns ON when a zero reset is set.
- [ST Indicator] Turns ON when Smart Tuning is in progress.
- [L/D Indicator] Turns ON when Light-ON (L) or Dark-ON (D).
- [Tight Button] Executes Smart Tuning.

**E3NC-SA7/SA9/SA24/SA54**

- [LD Indicator] Indicates the setting status: Light-ON (L) or Dark-ON (D).
- [OUT1 Indicator] Turns ON when OUT1 is ON.
- [OUT2 Indicator] Turns ON when OUT2 is ON.
- [MODE Button] Used to switch between Detection Mode and Setting Mode.
- [ZERO Indicator] Turns ON when a zero reset is set.
- [ST Indicator] Turns ON when Smart Tuning is in progress.
- [L/D Indicator] Turns ON when Light-ON (L) or Dark-ON (D).
- [Tight Button] Executes Smart Tuning.
- [ZERO Indicator] Turns ON when a zero reset is set.
- [ST Indicator] Turns ON when Smart Tuning is in progress.
- [L/D Indicator] Turns ON when Light-ON (L) or Dark-ON (D).
- [Tight Button] Executes Smart Tuning.
Safety Precautions

To ensure safe operation, be sure to read and follow the Instruction Manual provided with the Sensor.

Indication and Meaning for Safe Use

Sensor Heads

Laser Safety

Various safety standards regarding laser devices are stipulated in Japan and abroad. When this Sensor Head is used in Japan and when it is assembled in Japan but exported to a foreign country, the safety standards are classified into three cases.

1. When Using the Sensor Head in Japan

JIS C6802 stipulates the safety measures that must be observed by the user for each type of laser equipment.

- **E3NC-LH**<sub>03</sub> Sensor Heads: Class 1
- **E3NC-SH**<sub>02</sub>, **E3NC-SH**<sub>01</sub> Sensor Heads: Class 1
- **E3NC-SH**<sub>H</sub> Sensor Heads: Class 2

**WARNING**

Do not expose your eyes to the laser beam either directly or indirectly (i.e., after reflection from a mirror or shiny surface). The laser beam has a high power density and exposure may result in loss of sight.

Attention

Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.

Do not disassemble the Sensor Head. Doing so may cause the laser beam to leak, resulting in a risk of visual impairment.

- The following laser warning label and laser description labels are attached to the sides of the Sensor Heads.

<table>
<thead>
<tr>
<th>Description Label</th>
<th>Certification Label</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Laser Product</strong></td>
<td><img src="image" alt="Certification Label" /></td>
</tr>
</tbody>
</table>

**E3NC-LH03**

/E3NC-LH02

**E3NC-SH**

**E3NC-SH**<sub>H</sub>

2. Using in the USA

When using devices in which the Sensor Head is installed in the USA, the devices are subject to FDA (Food and Drug Administration) laser regulations of the USA.

**E3NC-LH03:**

These Sensor Heads are classified as Class 1 laser devices under IEC/EN 60825-1 and the regulations of Laser Notice No. 50 for this certification. Application to the CDRH (Center for Devices and Radiological Health) is scheduled.

**E3NC-LH01, E3NC-LH02:**

These Sensor Heads are classified as Class 1 laser devices under IEC/EN 60825-1 and the regulations of Laser Notice No. 50 for this certification. CDRH (Center for Devices and Radiological Health) registration has been completed. (Accession Number: 1220690)

**E3NC-SH**<sub>H</sub>, **E3NC-SH**<sub>H</sub>:

These Sensor Heads are classified as Class 1 or Class 2 laser devices under IEC/EN 60825-1 and the regulations of Laser Notice No. 50 for this certification. CDRH (Center for Devices and Radiological Health) registration has been completed. (Accession Number: 1220691)

- For countries other than Japan

Replace the warning label with the corresponding English label (supplied with SH**<sub>H</sub>).

3. Using in Europe

**E3NC-LH**<sub>03</sub>, **E3NC-SH**<sub>H</sub>:

These Sensor Heads are classified in Class 1 under EN 60825-1.

**E3NC-SH**<sub>H</sub>:

These Sensor Heads are classified in Class 2 under EN 60825-1.
Precautions for Safe Use

The following precautions must be observed to ensure safe operation of the Sensor Head.

1. Installation Environment
   - Do not use the Sensor Head in an environment where explosive or flammable gas is present.
   - To secure the safety of operation and maintenance, do not install the Sensor Head close to high-voltage devices or power devices.

2. Power Supply and Wiring
   - Always use an E3NC-LA, E3NC-LA0, E3NC-SA, or E3NC-SA0 Amplifier Unit. If a different Amplifier Unit is used, damage or fire may occur.
   - If you short the cable, reconnect it as specified. If the connections are not correct, damage or fire may occur.
   - High-voltage lines and power lines must be wired separately from the Sensor Head. Wiring them together or placing them in the same duct may cause induction, resulting in malfunction or damage.
   - Always turn OFF the power supply before connecting or disconnecting the connectors.

3. Installation
   - Use screws for installation and tighten the screws securely, but do not exceed the specified tightening torque. Specified torque (M3): 0.5 N·m

4. Others
   - Never disassemble (including removing labels), repair, modify, deform by pressure, or incinerate the Sensor Head. Do not turn the adjuster on the E3NC-LH02 with a force that is greater than 40 mN·m. Damage or fire may occur.
   - Dispose of the Sensor Head as industrial waste.
   - If you notice any abnormalities, immediately stop using the Sensor Head, turn OFF the power supply, and contact your OMRON representative.

5. Conditions of UL
   - For safety reasons, use the E3NC-LA, E3NC-LA0, E3NC-SA, or E3NC-SA0 Amplifier Unit. If a different Amplifier Unit is used, damage or fire may occur.
   - Dispose of the Sensor Head as industrial waste.

6.短ening the connection cable for use
   - The shortened cable has not been evaluated by UL.

Precautions for Correct Use

Observe the following precautions to prevent failure to operate, malfunctions, or undesirable effects on Sensor Head performance.

1. Installation Environment
   - Do not install the Sensor Head in locations subject to the following conditions:
     - Ambient temperatures outside of the rated range
     - Condensation caused by rapid changes in temperature
     - Relative humidity that is not between 35% and 85%
     - Corrosive or flammable gas
     - Dust, salt, or iron particles
     - Direct vibration or shock
     - Strong external light interference (such as other laser beams or electric arc-welding machines)
     - Direct sunlight or near heaters
     - Water, oil, or chemical fumes or spray
     - Strong magnetic or electric fields

2. Warming Up
   - The circuits will be unstable just after the power supply is turned ON, so measurement values may fluctuate gradually.
   - For accurate measurements, allow the product to stand for at least 10 minutes after turning ON the power supply before use. (E3NC-S Series)

3. Maintenance and Inspection
   - Always turn OFF the power supply before adjusting or connecting/disconnecting the Sensor Head.
   - Do not use thinner, benzene, acetone, or kerosene to clean the Sensor Head.
   - If large dust particles or dirt adheres to the filter on the front of the Sensor Head, use a blower brush (such as one used to clean camera lenses) to blow it off. To remove dust particles or dirt with your mouth. To remove dust particles or dirt, wipe it off gently with a soft cloth (such as one for cleaning lenses) moistened with a small amount of alcohol. Do not wipe it off with excessive force. Scratches on the filter may cause errors.

4. Sensing Object
   - The Sensor Head cannot accurately measure objects with the following materials and shapes: Transparent objects (with the E3NC-LH03, objects that are extremely transparent), objects with an extremely low reflection ratio, objects smaller than the spot diameter, objects with a large curvature, excessively inclined objects, etc. Also, for long-distance detection, the Sensor may falsely operate if a white object approaches near the Sensor Head (E3NC-LH03).

5. Do not use the Sensor in water, rainfall, or outdoors.

6. A ferrite core is attached to the Sensor Head end of the cable connected to the E3NC-LH03 5M. Do not remove the ferrite core or change its position. Also, do not bend the cable within 12 mm of each end of the ferrite core. Doing so may damage the cable.

Attaching a Lens Attachment (E39-P51 or E39-P52)

1. Check the widths of the slots in the Sensor and the widths of the tabson the Lens Attachment as shown below. (The Lens Attachment must be in the correct orientation, so the widths of the tabs on the Lens Attachment are different on the top and bottom.)

2. After you attach the Lens Attachment, make sure that the tabs are completely engaged in the slots in the Sensor.
Amplifier Units

**WARNING**

This Amplifier Unit is not designed or rated for ensuring safety of persons either directly or indirectly. Do not use it for such purposes.

Do not use the Amplifier Unit with voltage in excess of the rated voltage. Excess voltage may result in malfunction or fire.

Never use the Amplifier Unit with an AC power supply. Otherwise, explosion may result.

### Precautions for Safe Use

The following precautions must be observed to ensure safe operation of the Amplifier Unit. Doing so may cause damage or fire.

1. Do not install the Amplifier Unit in the following locations.
   - Locations subject to direct sunlight
   - Locations subject to condensation due to high humidity
   - Locations subject to corrosive gas
   - Locations subject to vibration or mechanical shocks exceeding the rated values
   - Locations subject to exposure to water, oil, chemicals
   - Locations subject to steam
   - Locations subjected to strong magnetic field or electric field
2. Do not use the Amplifier Unit in environments subject to flammable or explosive gases.
3. Do not use the Amplifier Unit in any atmosphere or environment that exceeds the ratings.
4. To secure the safety of operation and maintenance, do not install the Amplifier Unit close to high-voltage devices or power devices.
5. High-voltage lines and power lines must be wired separately from the Amplifier Unit. Wiring them together or placing them in the same duct may cause induction, resulting in malfunction or damage.
6. Do not apply any load exceeding the ratings. Otherwise, damage or fire may result.
7. Do not short the load. Otherwise, damage or fire may result.
8. Connect the load correctly.
9. Do not miswire such as the polarity of the power supply.
10. Do not use the Amplifier Unit if the case is damaged.
11. Burn injury may occur. The Amplifier Unit surface temperature rises depending on application conditions, such as the ambient temperature and the power supply voltage. Attention must be paid during operation or cleaning.
12. When setting the sensor, be sure to check safety such as by stopping the equipment.
13. Be sure to turn off the power supply before connecting or disconnecting wires.
14. Do not attempt to disassemble, repair, or modify the Amplifier Unit in any way.
15. When disposing of the Amplifier Unit, treat it as industrial waste.

When using the Amplifier Units with Wire-saving Connectors, attach the protective stickers (provided with E3X-CN-series Connectors) on the unused power pins to prevent electrical shock and short circuiting.

When using the Amplifier Units with Connectors for Sensor Communications Units, attach the protective caps (provided with E3NW-series Sensor Communications Units).

#### Precautions for Correct Use

1. Be sure to mount the unit to the DIN track until it clicks.
2. When using the Amplifier Units with Wire-saving Connectors, attach the protective stickers (provided with E3X-CN-series Connectors) on the unused power pins to prevent electrical shock and short circuiting.
3. Use an extension cable with a minimum thickness of 0.3 mm² and less than 10 m long.
4. Do not apply the forces on the cord exceeding the following limits:
   - Pull: 40 N; torque: 0.1 N·m; pressure: 20 N; bending: 29.4 N
5. Do not apply excessive force (9.8 N max.) such as tension, compression or torsion to the connector of the Sensor Head that is fixed to the Amplifier Unit.
6. Always keep the protective cover in place when using the Amplifier Unit. Not doing so may cause malfunction.
7. It may take time until the received light intensity and measured value become stable immediately after the power is turned on depending on use environment.
8. The product is ready to operate 200 ms after the power supply is turned ON.
10. The mutual interference prevention function does not work when in combination with E3C/E2C/E3X.
11. If the unit receives excessive sensor light, the mutual interference prevention function may not work properly, resulting in malfunction of the unit. In such case, increase the threshold.
12. Standard models (E3NC-LA21/S17/0)
    - The Sensor Communications Unit E3X-DRT21-S, E3X-CRT, E3X-ECT and E3NW cannot be connected.
    - Model for Sensor Communications Unit (E3NC-LA21/S17/A0)
    - The Sensor Communications Unit E3NW can be connected. E3X-DRT21-S, E3X-CRT, E3X-ECT cannot be connected.
13. If you notice an abnormal condition such as a strange odor, extreme heating of the unit, or smoke immediately stop using the product, turn off the power, and consult your dealer.
14. Do not use thinner, benzene, acetone, and lamp oil for cleaning.

---

**SA21/51**

The following precautions must be observed to ensure safe operation of the Amplifier Unit. Doing so may cause damage or fire.

1. Do not install the Amplifier Unit in the following locations.
   - Locations subjected to strong magnetic field or electric field
   - Locations subject to steam
   - Locations subject to exposure to water, oil, chemicals
   - Locations subject to vibration or mechanical shocks exceeding the rated values
   - Locations subject to corrosive gas
   - Locations subject to condensation due to high humidity
2. Do not use the Amplifier Unit in any atmosphere or environment that exceeds the ratings.
3. Do not use the Amplifier Unit with voltage in excess of the rated voltage.
4. Do not apply any load exceeding the ratings. Otherwise, damage or fire may result.
5. High-voltage lines and power lines must be wired separately from the Amplifier Unit. Wiring them together or placing them in the same duct may cause induction, resulting in malfunction or damage.
6. Do not apply any load exceeding the ratings. Otherwise, damage or fire may result.
7. Do not use the Amplifier Unit if the case is damaged.
8. Burn injury may occur. The Amplifier Unit surface temperature rises depending on application conditions, such as the ambient temperature and the power supply voltage. Attention must be paid during operation or cleaning.
9. When setting the sensor, be sure to check safety such as by stopping the equipment.
10. Be sure to turn off the power supply before connecting or disconnecting wires.
11. Do not attempt to disassemble, repair, or modify the Amplifier Unit in any way.
12. When disposing of the Amplifier Unit, treat it as industrial waste.

When using the Amplifier Units with Wire-saving Connectors, attach the protective stickers (provided with E3X-CN-series Connectors) on the unused power pins to prevent electrical shock and short circuiting.

When using the Amplifier Units with Connectors for Sensor Communications Units, attach the protective caps (provided with E3NW-series Sensor Communications Units).
Dimensions

Sensor Heads

Retro-reflective Model
E3NC-LH03

Vinyl-insulated Cable
Two, 2.3-dia., 6 conductors
(Condutor cross-section: 0.08 mm², Insulation diameter: 0.38 mm), Standard cable length: 2 m, Minimum bending radius: 12 mm

Connectors
Two, M3 holes

Mounting Holes
Two, M3 holes

Ferrite core
* A ferrite core is attached to the Sensor Head end of the cable attached to the E3NC-LH03 5M.

*2 A blue ID tube is attached.

Diffuse-reflective Model
E3NC-LH02

Vinyl-insulated Cable
Two, 3.2-dia., 6 conductors
(Condutor cross-section: 0.08 mm², Insulation diameter: 0.38 mm), Standard cable length: 2 m, Minimum bending radius: 12 mm

Mounting Holes
Two, M3 holes

Connector
Two, M3 holes

* A blue ID tube is attached.
Limited-reflective Model
E3NC-LH01

Distance-settable Models
E3NC-SH250H
E3NC-SH250
E3NC-SH100

*1 E3NC-SH100
L = 35 to 100 mm, A = 15.92° to 5.67°

E3NC-SH250H/250
L = 35 to 250 mm, A = 15.92° to 2.27°

Vinyl-insulated Cable
Two, 2.3 dia., 6 conductors
(Conductor cross-section: 0.08 mm², Insulation diameter: 0.38 mm),
Standard cable length: 2 m, Minimum bending radius: 12 mm

* A blue ID tube is attached.

E3NC-SA54

*1. The indicators are as follows:
- E3NC-LA24: DPC indicator
- E3NC-LA54: DPC indicator
- E3NC-SA24: ZERO indicator
- E3NC-SA54: ZERO indicator

**2. The display is as follows:
- E3NC-LA24: Incident level (white, digital)
- E3NC-LA54: Incident level (white, digital)
- E3NC-SA24: Measurement value (white, digital)
- E3NC-SA54: Measurement value (white, digital)

Amplifier Units with Connectors for Sensor Communications Unit
E3NC-LA0
E3NC-SA0

*1. The indicators are as follows:
- E3NC-LA0: DPC indicator
- E3NC-SA0: ZERO indicator

*2. The display is as follows:
- E3NC-LA0: Incident level (white, digital)
- E3NC-SA0: Measurement value (white, digital)
Accessories (Sold Separately)

Reflectors for Retro-reflective Sensors

**E39-R21**
- **Materials**
  - Reflective surface: Methacrylic resin (PMMA)
  - Back surface: Polybutylene terephthalate (PBT)
- **Mounting Holes**
  - Two, 3.2 dia. holes

**E39-R22**
- **Materials**
  - Reflective surface: Methacrylic resin (PMMA)
  - Back surface: Polybutylene terephthalate (PBT)
- **Mounting Holes**
  - Two, 3.2 dia. holes

**E39-RS10**
- Materials: Methacrylic resin (PMMA)
- **Dimensions**
  - 25 (without release paper)

**E39-RS11**
- Materials: Methacrylic resin (PMMA)
- **Dimensions**
  - 50 (without release paper)

Lens Attachment

**E39-P51**
- **Materials**
  - Main body: ABS
  - Lens: Methacrylic resin (PMMA)
- **With E39-P51 Lens Attachment Attached**

**E39-P52**
- **Materials**
  - Main body: ABS
  - Lens: Methacrylic resin (PMMA)
- **With E39-P52 Lens Attachment Attached**

Specifications and Use

1. Suitability of Use. Omron Companies shall not be responsible for conformity with any standards, codes or regulations which apply to the combination of the Product in Buyer's use, application, or environment. At Buyer's request, Omron will provide applicable third party certification documents identifying regulatory conformance. Any use of the Product in an environment or application which it is not sufficient for a complete determination of the suitability of the Product for Buyer's use, application, or environment shall not relieve Buyer of the responsibility for determining the suitability of the Product for Buyer's use, application, or environment. Buyer shall be solely responsible for determining appropriateness of the particular Product with respect to Buyer's use, application, product, or system. Omron's statements in writing, relating to the sale of products or services (collectively, the "Products") or any other provision in this document, "including without limitation"; and "Omron Companies" shall not be liable for the suitability or unsuitability or the results from the use of Products in combination with any electrical or electronic components, circuits, system assemblies or any other materials or substances or environments. Any advice, recommendations, information given orally or in writing, are not to be construed as an amendment or addition to the above warranty. See www.omron247.com or contact your Omron representative for published information.

2. Programmable Products. Omron Companies shall not be liable for special, indirect, incidental, or consequential damages, loss of profits or production or commercial loss in any way connected with the Products, or any modification to the Products, or any alteration or addition to the Products, or any consequence thereof. Further, in no event shall liability of Omron Companies exceed the individual price of the Product on which liability is asserted.

3. Performance Data. Data presented in Omron Company websites, catalogs and other materials is provided as a guide for the use in determining suitability and does not constitute a warranty. It may represent the result of Omron's test conditions, and the user must correlate it to actual application requirements. Actual performance is subject to the Omron's Warranty and Limitations herein, "including without limitation"; and "Omron Companies" shall not be liable for the unsuitability or the results from the use of Products or services with the exception of the Products for which Omron's statements in writing, relating to the sale of products or services (collectively, the "Products") or any other provision in this document, "including without limitation"; and "Omron Companies" shall not be liable for the unsuitability or the results from the use of Products in combination with any electrical or electronic components, circuits, system assemblies or any other materials or substances or environments. Any advice, recommendations, information given orally or in writing, are not to be construed as an amendment or addition to the above warranty. See www.omron247.com or contact your Omron representative for published information.

4. Change in Specifications. Product specifications and accessories may be changed at any time based on improvements and other reasons. It is our practice to change part numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the Product may be changed without any notice. When in doubt, specify part numbers when placing orders. Omron reserves the right to change part numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the Product may be changed without any notice. When in doubt, specify part numbers when placing orders. Omron reserves the right to change part numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the Product may be changed without any notice. When in doubt, specify part numbers when placing orders.
