NJ-Series Power Supply Unit
NJ-PA/PD

Powerful power supply unit to supply stable power to the NJ-series controller.

Stable power supply is available from the NJ-series CPU Unit to each I/O Unit via the dedicated bus. Lineups are provided for AC and DC input types with 30 W output.

Features
- AC input type (100 to 240 VAC)/DC input type (24 VDC) with 30 W output allows power supply to large-scale configurations.
- Operating output contact indicates the CPU operation status (available in all models).

Ordering Information

International Standards
- The standards are abbreviated as follows: U: UL, U1: UL(Class I Division 2 Products for Hazardous Locations), C: CSA, UC: cULus, UC1: cULus (Class I Division 2 Products for Hazardous Locations), CU: cUL, N: NK, L: Lloyd, and CE: EC Directives.
- Contact your OMRON representative for further details and applicable conditions for these standards.

**1.** The AC and DC values above are given for a cold start, and the AC values are at room temperature. The AC inrush control circuit uses a thermistor element with a low-temperature current control characteristic. If the ambient temperature is high or the Controller is hot-started, the thermistor will not be sufficiently cool, and the inrush current given in the table may be exceeded by up to twice the given value. The DC inrush control circuit uses a capacitor-charging delay circuit. If the power is OFF for only a short time for a hot-start, the capacitor will not sufficiently discharge and the inrush current given in the table may be exceeded by up to twice the given value. An inrush current of approximately 4 A may occur and continue for 1 s when the power is turned ON. When selecting fuses, breakers, and external DC power supply devices for external circuits, allow sufficient margin in shut-off performance.

**2.** Internal components in the Power Supply Unit will deteriorate or be damaged if the Power Supply Unit is used for an extended period of time exceeding the power supply output capacity or if the outputs are shorted.

**3.** Supported only when mounted to CPU Rack.

**4.** The tests can also be performed with the LG terminal and GR terminal connected to each other.

**5.** Change the applied voltage gradually using the adjuster on the Tester. If the full dielectric strength voltage is applied or turned OFF using the switch on the Tester, the generated impulse voltage may damage the Power Supply Unit.
External Interface

NJ-PA3001

AC Input
Supply 100 to 240 VAC (allowable: 85 to 264 VAC).
The NJ-PA3001 has a wide input range, so it does not have voltage switching terminals.

DC Input
Supply 24 VDC (allowable: 19.2 to 28.8 VDC.)

LG
Ground to a resistance of 100 Ω or less to increase noise resistance and avoid electric shock.

GR
Ground to a resistance of 100 Ω or less to avoid electric shock.

RUN Output
The internal contacts for the RUN output turn ON when the CPU Unit is in RUN status.

NJ-PD3001

AC Input
Supply 100 to 240 VAC (allowable: 85 to 264 VAC).
The NJ-PA3001 has a wide input range, so it does not have voltage switching terminals.

DC Input
Supply 24 VDC (allowable: 19.2 to 28.8 VDC.)

LG
Ground to a resistance of 100 Ω or less to increase noise resistance and avoid electric shock.

GR
Ground to a resistance of 100 Ω or less to avoid electric shock.

RUN Output
The internal contacts for the RUN output turn ON when the CPU Unit is in RUN status.
Wiring

About Power Supply

For AC/DC power supply

<table>
<thead>
<tr>
<th>Recommended wire diameter</th>
<th>AWG 14 to 20 (Cross section 0.517 to 2.08 mm²)</th>

Crimp Terminals

The terminals on the Power Supply Unit are M4, self-raising terminals with screws.

Crimp Terminals for AC Power Supplies

7 mm max.

Crimp Terminals for DC Power Supplies

7 mm max.

Crimp terminal for the grounding wire

7 mm max.

Precautions for Use

Compatible CPU Models

NJ-PA3001/NJ-PD3001 are dedicated for NJ-series.

Please make sure to use NJ-PA3001/NJ-PD3001 for all products including NJ-series CPU rack and expansion rack.

Power Supply Units Current Consumption

Checking Current Consumption and Power Consumption

After selecting a Power Supply Unit based on considerations such as the power supply voltage, calculate the current and power requirements for each Rack.

Condition 1: Current Requirements

There are two voltage groups for internal power consumption: 5 V and 24 V.

Current consumption at 5 V (internal logic power supply)

Current consumption at 24 V (relay driving power supply)

Condition 2: Power Requirements

For each Rack, the upper limits are determined for the current and power that can be provided to the mounted Units. Design the system so that the total current consumption for all the mounted Units does not exceed the maximum total power or the maximum current supplied for the voltage groups shown in the following tables.

The maximum current and total power supplied for CPU Racks and Expansion Racks according to the Power Supply Unit model are shown below.

Note: 1. For CPU Racks, include the CPU Unit current and power consumption in the calculations. When expanding, also include the current and power consumption of the I/O Control Unit in the calculations.

2. For Expansion Racks, include the I/O Interface Unit current and power consumption in the calculations.

* Including supply to the CPU Unit.

Conditions 1 and 2 below must be satisfied.

Condition 1: Maximum Current

(1) Total Unit current consumption at 5 V ≤ (A) value

(2) Total Unit current consumption at 24 V ≤ (B) value

Condition 2: Maximum Power

(1) × 5 V + (2) × 24 V ≤ (C) value
Example: Calculating Total Current and Power Consumption

Example: When the Following Units are Mounted to a NJ-Series CPU Rack Using a NJ-PA3001 Power Supply Unit

Using the Sysmac Studio to Display Current Consumption and Width

CPU Rack and Expansion Rack current consumption and width can be displayed by selecting CPU/Expansion Racks from the Configurations and Setup in the Multiview Explorer. If the capacity of the Power Supply Unit is exceeded, an error icon is displayed in the power supply unit of a corresponding rack. For details, refer to Symac Studio Version 1 Operation manual (W504).

Use this manual together with the NJ-series CPU Unit Software User’s Manual (Cat. No. W501). |
These terms and conditions (these “Terms”) are deemed part of the purchase agreement and shall be binding upon Seller, Purchaser, and any direct or indirect assignees of either. Seller objects to any terms or conditions proposed in Buyer’s purchase order or other documents which are inconsistent with, or in addition to, these Terms.

2. Prices; Payment Terms. All prices stated are current, subject to change without notice, and quoted by Omron to reserved accounts may be different. Prices are F.O.B. Lily, Illinois, and terms of payment are net 30 days. All prices are subject to change on any unshipped portions of outstanding orders. Payments for Products are due net 30 days unless otherwise stated in the invoice.

3. Delivery; Call Backs. If any applicable order limit is exceeded or if any net amount of invoices sent to Buyer after deducting transportation charges, taxes and duties, and will be allowed only if (i) the invoice is paid according to Omron’s payment terms and (ii) Buyer has no past due amounts.

4. Interest. Omron, at its option, may charge Buyer 1-1/2% interest per month on past due balance at the lesser rate that may be permitted by law, which is less than the maximum rate permitted by law.

5. Orders. Omron will accept no order less than $200 net billing.

6. Governmental Approvals. Buyer shall be responsible for, and shall bear all costs involved in, obtaining any government approvals required for the importation or sale of the Products.

7. Taxes. All taxes, duties and other governmental charges (other than general real property and income taxes), including any interest or penalties thereon, imposed directly or indirectly on Omron or required to be collected directly or indirectly by Omron for the manufacture, production, sale, delivery, importation, conversion or use of the Products sold hereunder and any other governmental charges, taxes, interest, penalties, fines, or fees, if any, shall be paid by Buyer, unless otherwise expressly agreed in writing by Omron.

8. Financial Statement. If the financial position of Buyer at any time becomes unsatisfactory to Omron, Omron reserves the right to stop shipments or require satisfactory security in advance, and if Buyer fails to make payment for any Product that is in compliance with these Terms or any related agreement, Omron may, without liability and in addition to other remedies, cancel any unshipped portion of Product and stop the delivery of any Products to Buyer at prices, including amounts payable hereunder, whether or not then due, which Omron deems advisable in its discretion.

9. Cancellation; Etc. Orders are subject to rescheduling or cancellation unless Buyer indemnifies Omron against all related costs or expenses.

10. Force Majeure. Omron shall not be liable for any delay or failure in delivery resulting from circumstances beyond Omron’s control, including fire, flood, storm, accidents, malfunctions, work stoppages, strikes, governmental restrictions, political disturbances, acts of God, acts of war or terrorism, or any other causes beyond Omron’s control.

11. Shipping; Delivery. Unless otherwise expressly agreed in writing by Omron, (a) Shipments shall be by a carrier selected by Omron; Omron will not drop ship Products; (b) Such carrier shall act as the agent of Buyer and delivery to such carrier shall constitute delivery to Buyer; (c) All sales and shipments of Products shall be FOB shipping point (unless otherwise stated in writing by Omron), at which point title and risk of loss shall pass from Omron to Buyer; provided that Omron shall retain a security interest in the Products until the full purchase price is paid; (d) Delivery and shipping dates are estimates only; and (e) Omron will package Products as it deems proper for protection against normal handling and extra charges apply to special conditions.

12. Claims Against Buyer. Claims for damage to or loss of Products occurring before delivery to the carrier must be presented in writing to Omron within ten days after delivery and before accepting Products. Claims for damage to or loss of Products occurring after delivery to the carrier must be presented in writing to Omron within ten days after discovery of damage or loss.

13. Warranties; Limitations. Omron’s exclusive warranty is that the Products will be free from defects in materials and workmanship for a period of one year from the date of delivery to Buyer, but Omron’s liability under any warranty is limited to either (i) Buyer’s return of the Product in the condition it was received and Omron’s inspection of it, (ii) repair of the Product free of charge to Buyer, or (iii) if Buyer is unable or unwilling to return the Product, Omron shall refund Buyer the purchase price of the Product, or (iii) if purchase price of the Product, or (iii) if Buyer requests, Omron shall replace the Product, at no cost to Buyer.

14. Indemnities. Buyer shall indemnify and hold harmless Omron and Omron’s employees from and against all liabilities, losses, claims, costs and expenses (including attorney’s fees and expenses) related to any claim, investigation, litigation or proceeding (whether or not Omron is a party) which arises or is alleged to arise from (i) Buyer’s acts or omissions under these Terms or in any way with respect to the Products. Without limiting the foregoing, Buyer (at its own expense) shall indemnify and hold harmless Omron and Omron’s employees from and against all liabilities, losses, claims, costs and expenses (including attorney’s fees and expenses) related to any claim, investigation, litigation or proceeding (whether or not Omron is a party) which arises or is alleged to arise from (i) Buyer’s acts or omissions under these Terms or in any way with respect to the Products.

15. Property; Confidentiality. Any intellectual property in the Products is the exclusive property of Omron. Omron reserves all rights in and to the Products. Omron shall not be liable for any delay or failure in delivery resulting from circumstances beyond Omron’s control, including fire, flood, storm, accidents, malfunctions, work stoppages, strikes, governmental restrictions, political disturbances, acts of God, acts of war or terrorism, or any other causes beyond Omron’s control.

16. Export Controls. Buyer shall comply with all applicable laws, regulations and licenses regarding (i) export of products or information; (ii) sale of products to any country or individual, and (iii) operation of its business in any way that would contravene or otherwise violate any law or prohibition of the U.S. (or similar words) mean Omron Corporation and any direct or indirect subsidiary or affiliate thereof.

Certain Precautions on Specifications and Use

1. Suitability of Use. Omron Companies shall not be responsible for conformity with any standards, codes or regulations which apply to the combination of the Product in the Buyer’s application or use of the Product. At Buyer’s request, Omron will provide applicable third party certification documents identifying recognized limits and limitations Any application of a Product not found within these limitations itself is not sufficient for a complete determination of the suitability of the Product for combination with other products, application or use. Buyer shall be solely responsible for determining appropriateness of the particular Product with respect to Buyer’s application, product or system. Buyer shall be solely responsible for determining appropriateness of the particular Product with respect to Buyer’s application, product or system.

2. Programmable Products. Except in “break down” situations, Buyer must be approved in writing by Omron before shipment. Omron Companys shall not be liable for any delay or failure in delivery resulting from circumstances beyond Omron’s control, including fire, flood, storm, accidents, malfunctions, work stoppages, strikes, governmental restrictions, political disturbances, acts of God, acts of war or terrorism, or any other causes beyond Omron’s control.

3. Performance Data. Data presented in Omron Company websites, catalogs and other materials is provided as a guide to the user in determining suitability and does not constitute a warranty. It may represent the result of Omron’s test conditions, and the user must correlate it to actual application requirements. Actual performance is subject to the test conditions, and the user must correlate it to actual application requirements. Actual performance is subject to the test conditions, and the user must correlate it to actual application requirements.

4. Changes in Specifications. Product specifications and accessories may be changed at any time based on improvements and other reasons. It is our practice to change part numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the Product may be changed without any notice. When in doubt, special part numbers may be assigned to fix or establish key specifications for your application. Please consult with your Omron’s representative at any time to confirm actual specifications of purchased Product.

5. Errors and Omissions. Information in this document has been compiled and is believed to be accurate; however, no responsibility is assumed for clerical, typographical or proofreading errors or omissions.

---

ADDRESS THE RISKS, AND THAT THE OMRON’S PRODUCT IS PROP-ERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL SYSTEM OR EQUIPMENT.
