Notice:

OMRON products are manufactured for use according to proper procedures by a qualified operator and only for the purposes described in this manual. The following conventions are used to indicate and classify precautions in this manual. Always heed the information provided with them. Failure to heed precautions can result in injury to people or damage to property.

⚠️ DANGER  Indicates an imminently hazardous situation which, if not avoided, will result in death or serious injury.

⚠️ WARNING  Indicates a potentially hazardous situation which, if not avoided, could result in death or serious injury.

⚠️ Caution  Indicates a potentially hazardous situation which, if not avoided, may result in minor or moderate injury, or property damage.

OMRON Product References

All OMRON products are capitalized in this manual. The word “Unit” is also capitalized when it refers to an OMRON product, regardless of whether or not it appears in the proper name of the product. The abbreviation “Ch,” which appears in some displays and on some OMRON products, often means “word” and is abbreviated “Wd” in documentation in this sense. The abbreviation “PLC” means Programmable Controller. “PC” is used, however, in some Programming Device displays to mean Programmable Controller.

Visual Aids

The following headings appear in the left column of the manual to help you locate different types of information.

Note  Indicates information of particular interest for efficient and convenient operation of the product.

1,2,3... 1. Indicates lists of one sort or another, such as procedures, checklists, etc.

Index .......................................................................................................................... 42
Thank you for purchasing the CS1W-CIF31 USB-Serial Conversion Cable. The CS1W-CIF31 USB-Serial Conversion Cable connects an OMRON PLC (or PT) to a personal computer's USB port. Please read this manual carefully and be sure you understand the information provided before attempting to install or operate the USB-Serial Conversion Cables. Be sure to read the precautions provided in the following section.

**Precautions** provides general precautions for using the USB-Serial Conversion Cables and related devices. **Overview and Components** describes the parts of the USB-Serial Conversion Cables and gives an overview of their application. **Packing Lists** shows the various items that come with the USB-Serial Conversion Cables. **Specifications** provides the hardware and software specifications. **Dimensions** shows external cable dimensions. **System Configuration** shows the application of the USB-Serial Conversion Cables with various models of PLC. **USB to PLC/PT Connection Tables** lists the possible combinations of Cables, Units, and ports that can be used. **Application Procedure** gives an overview of the steps required to use USB-Serial Conversion Cables. **DIP Switch Settings and Cable Connections** describes switch settings and cable connections. **Installing the Drivers** tells how to install the software drivers. **Uninstalling the Drivers** tells how to uninstall the software drivers. **Connecting Online from the CX-Programmer** tells how to connect to a PLC or PT from a computer running the CX-Programmer.

**WARNING** Failure to read and understand the information provided in this manual may result in personal injury or death, damage to the product, or product failure. Please read each section in its entirety and be sure you understand the information provided in the section and related sections before attempting any of the procedures or operations given.
**PRECAUTIONS**

This section provides general precautions for using the USB-Serial Conversion Cable and related devices.

**The information contained in this section is important for the safe and reliable application of the USB-Serial Conversion Cable. You must read this section and understand the information contained before attempting to set up or operate a USB-Serial Conversion Cable and PLC system.**

**Intended Audience**

This manual is intended for the following personnel, who must also have knowledge of electrical systems (an electrical engineer or the equivalent).

- Personnel in charge of purchasing FA devices.
- Personnel in charge of designing FA systems.
- Personnel in charge of managing FA systems and facilities.

**General Precautions**

- The user must operate the product according to the performance specifications described in the operation manuals.
- Consult your OMRON representative before using the product under conditions which are not described in the manual or applying the product to nuclear control systems, railroad systems, aviation systems, vehicles, combustion systems, medical equipment, amusement machines, safety equipment, and other systems, machines, and equipment that may have a serious influence on lives and property if used improperly.
- This manual provides important information for using the CS1W-CIF31 USB-Serial Conversion Cable. Be sure to read this manual before attempting to use the Conversion Cable and keep this manual close at hand for reference during operation.

**WARNING**

It is extremely important that a PLC and all PLC Units be used for the specified purpose and under the specified conditions, especially in applications that can directly or indirectly affect human life. You must consult with your OMRON representative before applying a PLC system to the above mentioned applications.

**Operating Environment Precautions**

Do not use the USB-serial Conversion Cable in the following places:

- Locations subject to strong electromagnetic fields.
- Locations subject to direct sunlight.
- Locations subject to temperatures or humidity outside the range specified in the specifications.
- Locations subject to condensation as the result of severe changes in temperature.
- Locations subject to corrosive or flammable gases.
- Locations subject to excessive dust, or salts, or metal filings.
- Locations subject to exposure to water, oil, or chemicals.
- Locations subject to shock or vibration.

Provide proper shielding when installing in the following locations:

- Locations subject to static electricity or other sources of noise.
- Locations subject to strong electromagnetic fields.
- Locations subject to possible exposure to radiation.
- Locations near power supply lines.
Application Precautions

Observe the following precautions when using the USB-Serial Conversion Cable.
• These cables are designed specifically to connect a personal computer to an OMRON PLC or PT. Do not use them to connect any other devices and do not use a commercially available USB-serial conversion cable in place of these cables. Improper usage of these cables may result in damage to external devices, the PLC, or the PT.
• Do not attempt to disassemble, repair, or modify any Units.
• Touch a grounded metal object to discharge any static electricity before connecting the Conversion Cable to the PLC's connector, a PLC Connecting Cable, or the personal computer's USB port.
• To avoid malfunctions due to noise, do not route the Conversion Cable parallel or close to a high-tension power line.
• Tighten the D-sub connector screws to a torque of 0.4 N·m.
• Either turn OFF the power supply to the computer or disconnect the cable from the USB connector before setting the DIP switch.
• Always lock any connectors that are equipped with locking mechanisms.
• Do not place anything on the cable.
• Do not bend the cable past its normal bending radius or pull on the cable.
• Touch the Unit only after touching a grounded metal object to release static electricity from your body.
• Disconnect or connect the cable only after confirming that communications are not in progress.
• Do not quickly and repeatedly connect and disconnect the USB connector. Doing so may cause the computer to malfunction.
• It may take some time for the computer to detect the cable after the cable is connected. This is not a malfunction.
• Do not connect the RS-232C connector on the CS1W-CIF31 Cable (D-sub type) directly to the RS-232C or RS-422/485 connector on the PLC. The cable may malfunction.
• Do not connect this cable to a USB hub; connect it directly to a USB connector on the computer. The cable may malfunction.
• Do not extend the USB portion of this cable with an extension cable. The cable may malfunction.
• Set the communications port (COM port) number used by the software to the communications port (COM port) number allocated to the Conversion Cable.

⚠️ Caution
Perform wiring so that the power supply wires are not exposed and do not come into contact with any metal parts. Contact with metal parts may cause a fire.
EC Directives

• Applicable Directives
  • EMC Directives
  • Low Voltage Directive

• Concepts
  
EMC Directives
OMRON devices that comply with EC Directives also conform to the related EMC standards so that they can be more easily built into other devices or the overall machine. The actual products have been checked for conformity to EMC standards (see the following note). Whether the products conform to the standards in the system used by the customer, however, must be checked by the customer.
EMC-related performance of the OMRON devices that comply with EC Directives will vary depending on the configuration, wiring, and other conditions of the equipment or control panel on which the OMRON devices are installed. The customer must, therefore, perform the final check to confirm that devices and the overall machine conform to EMC standards.

Note: Within the EMC (Electromagnetic Compatibility) standards, the applicable EMS (Electromagnetic Susceptibility) standard is EN61000-6-2 and the applicable EMI (Electromagnetic Interference) standard is EN61000-6-4 (10-m regulations.)

• Low Voltage Directive
Always ensure that devices operating at voltages of 50 to 1,000 VAC and 75 to 1,500 VDC meet the required safety standards (EN61131-2).

• Conformance to EC Directives
The CS1W-CIF31 USB-Serial Conversion Cables comply with EC Directives. Observe the following precautions to ensure that the machine or device in which the Conversion Cable is used complies with EC directives:
1. The CS1W-CIF31 USB-Serial Conversion Cable must be installed within a control panel.
2. Reinforced insulation or double insulation must be used for the DC power supplies providing the communications power supply and I/O power supplies.
3. CS1W-CIF31 USB-Serial Conversion Cables complying with EC Directives also conform to the Common Emission Standard (EN61000-6-4). Radiated emission characteristics (10-m regulations) may vary depending on the configuration of the control panel used, other devices connected to the control panel, wiring, and other conditions. You must therefore confirm that the overall machine or equipment complies with EC Directives.
Overview and Components

Overview

The CS1W-CIF31 USB-Serial Conversion Cable connects an OMRON PLC (Programmable Controller) or PT (Programmable Terminal) to a personal computer’s USB port. The cable can be used once the required drivers (on the provided CD-ROM) have been installed in the personal computer.

The Conversion Cable can be used with OMRON PLC/PT software, such as the CX-Programmer, which use the CX-Server or FinsGateway as a communications driver, as well as other OMRON Software, such as the DeviceNet Configurator.

</tbody>
</table>

The following software applications are also compatible.
• DeviceNet Configurator
• NT Support Tool for Windows
• ZEN Support Software Ver. 3.0 or later
• Software applications in CX-One

• Communications Port Limitations with the NT Support Tool
1) Version 4.00 and Earlier Versions
   Only communications ports COM1 and COM2 can be used. Always change the communications port allocation for this device to COM1 or COM2 in the Microsoft Windows Device Manager (see note 1) and specify that port in the NT Support Tool's communications settings. Once the communications port is specified correctly in the Windows Device Manager and the NT Support Tool's communications settings, data such as screen data can be downloaded to the PT or uploaded from the PT through the USB-Serial Conversion Cable.
   Note: In most personal computers, COM1 is allocated to the RS-232C port and communications port COM2 can be allocated to the Conversion Cable. Refer to Changing the Allocated Communications Port on page 38 for details on changing the communications port. Furthermore, if there is another driver using the allocated port, that driver must be uninstalled.

2) Version 4.60E and Later Versions
   Any communications port between COM 1 and COM8 can be used. Check the NT Support Tool's communications settings and verify that the communications port allocated to the Conversion Cable is also specified in the NT Support Tool.
Specifications

• Limitations when Using the NT Support Tool's System Installer
  1) Windows 98 and Windows Me
      The system program cannot be downloaded to the PT through the USB-Serial
      Conversion Cable.
      Only communications ports COM1 and COM2 can be used. Always change the
      communications port allocation for this device to COM1 or COM2 in the Microsoft
      Windows Device Manager (see note 1) and specify that port in the NT Support Tool's
      communications settings. Once the communications port is specified correctly in the
      Windows Device Manager and the NT Support Tool's communications settings, the
      system program can be downloaded to the PT through the USB-Serial Conversion
      Cable.
      Note: In most personal computers, COM1 is allocated to the RS-232C port and
      communications port COM2 can be allocated to the Conversion Cable. Refer to Changing
      the Allocated Communications Port on page 38 for details on changing the communications
      port. Furthermore, if there is another driver using the allocated port, that driver must be
      uninstalled.

Compatible PLCs, PTs and Programmable Relay

The following OMRON PLCs, PTs and Programmable Relay are supported by the
compatible software applications.

• PLCs
  CS/CJ-series, C-series (see note 1), and CVM1/CV-series

• PT
  NS-series and NT-series

• Programmable Relay
  ZEN (see note 2)

Note 1. The following C-series PLCs are supported: C200HS, C200HX/HG/HE, C200H, C1000H,
        C2000H, CQM1, CPM1, CPM1A, CPM2A, SRM1, CQM1H, and CPM2C.
Note 2. The ZEN Programmable Relay is supported only if ZEN Support Software Ver. 3.0 or later
        is used.
## Connection Configurations

The following table shows the connection configurations that can be used to connect an OMRON PLC (or PT) to a personal computer’s USB port.

<table>

</table>

### Note

The USB-Serial Conversion Cables are for connections between a USB port and an OMRON PLC/PT only. In particular, the CS1W-CIF31 Cable can be used only with compatible OMRON software applications even though it has a standard D-sub 9-pin connector on one end.

</table>
This section explains how to connect a PLC CPU Unit to a personal computer with a USB-Serial Conversion Cable. Use the procedure below when connecting a PLC CPU Unit and personal computer.

The Conversion Cable uses one of the computer's COM ports for communications. When communicating with a PLC through a Conversion Cable, set the communications port (COM port) number used by the software to the communications port (COM port) number allocated to the Conversion Cable.

1. Connect the Cable(s).
   Connect the Conversion Cable to the computer's USB port and the CPU Unit's peripheral port or RS-232C port.
   For details, refer to Connecting the Cable on page 28.

2. Install the communications driver.
   The Conversion Cable's communications driver must be installed in the computer in order for the computer to use the Conversion Cable.
   For details, refer to Installing the Driver on page 29.

3. Turn ON the PLC's power.
   Turn ON the PLC's power supply.

4. Make an online connection to the CPU Unit through the computer software (when using the CX-Programmer.)
   Select the COM port in the CPU Unit from the CX-Programmer and connect online.
   For details, refer to Connecting Online from the CX-Programmer on page 36.

Note
More than one USB-Serial Conversion Cable can be used at a time, so a single personal computer can be connected to several PLCs/PTs through two or more COM ports.
When more than one Conversion Cable is being used, connect the second and later Cables after the first Cable has been connected.
The communications driver is automatically installed for the second and later Cables, so it is not necessary to install the driver a second time. Each Cable must have its own unique COM port number. Allocate a different COM port to each Cable.
Connecting the Cable

Connect the computer and CPU Unit with one of the cable configurations shown in the USB to PLC/PT Connection Table on page 22.
Installing the Drivers

When the USB-Serial Conversion Cable is connected to the computer, the operating system (OS) will recognize the Cable as a new device. At this point, the driver can be installed with the wizard.

The actual driver installation method depends on the OS being used. Windows XP and Windows 7 are used in the examples in this section.

**Note**
The USB-Serial Conversion Cables are compatible with Windows XP.
When you install the Conversion Cable’s driver, a warning message will appear indicating that the driver software has not passed Windows Logo testing, but click **Continue Anyway** to proceed with the installation. We have thoroughly tested the driver on Windows XP and verified that it operates properly.

The driver will not be installed properly if the installation process is cancelled before completion. Normal communications may not be possible if the driver is not installed properly. If the driver is not installed properly, uninstall it (refer to page 37) and then reinstall it correctly.

**Note**
The USB-Serial Conversion Cables are compatible with Windows Vista/7.
When you install the Conversion Cable’s driver, a warning message will appear indicating that Windows can’t verify the publisher of this driver software, but click **Continue Anyway** to proceed with the installation. We have thoroughly tested the driver on Windows Vista and verified that it operates properly.

The driver will not be installed properly if the installation process is cancelled before completion. Normal communications may not be possible if the driver is not installed properly. If the driver is not installed properly, uninstall it (refer to page 37) and then reinstall it correctly.

<Windows XP>

1. The following window will be displayed.

![Windows XP Driver Installation Wizard](image)

2. Select the **No, not this time** and click the **Next** button. The following window will be displayed

![Windows XP Driver Installation Wizard](image)

3. Select the **Install from a list or specific location (Advanced)** and click the **Next** button.
Installing the Drivers

The following window will be displayed. Select the **Search for the best driver in there locations** and check the **Include this location in the search**.

4. Insert the CD-ROM containing the driver (the CD-ROM is in the same package as the Conversion Cable) into the computer’s CD-ROM drive. Click the **Browse** button, select the following directory of the CD-ROM and click the **OK** button.
   - Windows2000/XP/Vista/7: **win2000_XP_Vista_7**
   - Windows98/Me: **Win98_Me**
   Click the **Next** button in the **Please choose your search and installation options** window.

5. The following window will be displayed. Click the **Continue Anyway** button to start installing the driver.

6. The following window will be displayed if the driver was installed properly. Click the **Finish** button.

7. When the **Finish** button is clicked in step 6, the installation of the USB Serial Port driver will be automatically started.
   
   Follow the same procedure in steps 1 through 6 to install the USB Serial Port driver. (Driver installation is completed after installation of the USB Serial Port driver.)

8. When the installation is completed, the communications port (COM port) number will be automatically allocated. Refer to the **Verifying the Allocated Communications Port** on page 37 for how to confirm the allocated communications port number.
<Windows 7>

1. Insert this cable to the USB port of your computer. The following message will be displayed in the status area of the Task bar:

   
   Device driver software was not successfully installed

2. Click the System properties of Computer to start the Device Manager.

3. Right-click on the OMRON USB Serial Converter Drivers under the Other devices. Then, click the Update Driver Software... from the right-click menu.

4. The following window will be displayed. Click the Browse my computer for driver software.

5. The following window will be displayed.
Installing the Drivers

6. Insert the CD-ROM containing the driver (the CD-ROM is in the same package as the Conversion Cable) into the computer's CD-ROM drive. Click the **Browse** button, select the following directory of the CD-ROM and click the **OK** button.

   - Windows2000/XP/Vista/7: **win2000_XP_Vista_7**
   - Windows98/Me: **Win98_Me**

   Click the **Next** button in *Please choose your search and installation options* window.

7. Click the **Install this driver software anyway** in *Windows Security* window.

8. The following window will be displayed when the driver was installed properly. Click the **Close** button.

9. Next, right-click on the **USB Serial Port** of the *Device Manager* and click the **Update Driver Software...** from the right-click menu.

   Follow the same procedure in steps 4 through 8 to install the USB Serial Port driver.
   (Driver installation is completed after installation of the USB Serial Port driver.)

10. When the installation is completed, the communications port (COM port) number will be automatically allocated. Refer to the *Verifying the Allocated Communications Port* on page 37 for how to confirm the allocated communications port number.
Uninstalling the Drivers

Use the following procedure to delete (uninstall) the drivers for the USB-Serial Conversion Cable.

<Windows Vista/7>
1. Connect the Conversion Cable to computer.
2. Click System properties of Computer to start the Device Manager.
3. Click the OMRON CS1W-CIF3* USB Serial Port(COM3) in the Ports(COM & LPT) and click the Uninstall button.
4. Confirm Device Uninstall window will be displayed.
   Select Delete the driver software for the device and click the OK button.
5. Click the OMRON USB Serial Converter in the Universal Serial Bus controllers and click the Uninstall button.
6. Confirm Device Uninstall window will be displayed.
   Select Delete the driver software for the device and click the OK button.

This completes the deletion (uninstallation) of the Conversion Cable's drivers.

<Windows 2000/XP>
1. Disconnect the Conversion Cable from the computer.
2. Double-click the Ftclean.exe in the win2000_XP_Vista_7 folder from the CD-ROM to start the FTDI Clean Utility V1.0.
3. Select the Other from the pull-down menu of the VID (Hex) and enter 0590 in the right field. Then, click the Clean System button.
4. Information window will be displayed. Click the OK button.
Uninstalling the Drivers

5. The following window will be displayed. Click the Yes button.

6. The following window will be displayed. Click the No button.

7. FTDI Clean Utility V1.0 window will be displayed. Confirm that Status: System clean completed is displayed.

8. FTDI Clean Utility V1.0 window will be displayed. Click the Exit button.

This completes the deletion (uninstallation) of the Conversion Cable's drivers.

<Windows 98/Me>

1. Disconnect the Conversion Cable from the computer.
2. Select Add/Remove Programs from the Control Panel.
3. Select OMRON USB-to-Serial Converter Drivers and click the Delete button. The following window will be displayed.

4. Click the Continue button. When the drivers have been successfully deleted, the message Uninstall complete, press Finish to exit will be displayed.
5. Click the **Finish** button.

This completes the deletion (uninstallation) of the Conversion Cable’s drivers.
The USB-Serial Conversion Cable uses one of the computer's COM ports to communicate. The communications port (COM port) allocated to the Conversion Cable must be selected with the CX-Programmer in order to connect online to a PLC or PT.

Note: It may take some time for the computer to detect the cable after the cable is connected. This is not a malfunction.

Selecting the Cable's COM Port in CX-Programmer

Use the following procedure to select the COM port used by the Conversion Cable.

1. Display the Change PLC dialog box.

2. Click the Settings button in the Network Type area. Select the desired type of network. The Network Settings dialog box will be displayed.

3. Click the Driver tab in the Network Settings dialog box.
4. Locate the Port Name setting and select the COM port being used by the Conversion Cable.

![Network Settings Dialog Box]

**Note** If you fail to connect with this USB Cable, turn OFF auto baud rate detection if it is being used by your software. With the CX-Programmer, auto baud rate detection can be turned OFF by clearing the selection for it on the **Network Settings** dialog box.

### Verifying the Allocated Communications Port

The communications port (COM port) being used by the Conversion Cable can be verified with the following procedure. The actual verification procedure depends on the operating system. This example shows the procedure for Windows XP.

1. Open the **Control Panel**, open the **System** folder, and click the **Hardware** tab.
2. Click the **Device Manager** button.
3. Click the + symbol to the left of the **Ports (COM & LPT)** device icon to display the contents of that folder. Verify that there is an entry for the **OMRON CS1W-CIF3** *USB Serial Port (COM* device.

A communications port name will appear in parentheses. This is the communications port being used by the Conversion Cable.
Changing the Allocated Communications Port

The communications port (COM port) being used by the Conversion Cable can be changed with the following procedure. The actual change procedure depends on the operating system. This example shows the procedure for Windows XP.

**Note** If the new COM port is being used by another driver, that driver must be uninstalled.

1. Double-click **OMRON CS1W-CIF3* USB Serial Port (COM:)** in the Device Manager window.

2. Click the **Port Settings** tab.

![Device Manager Window](image1.png)

![Port Settings Tab](image2.png)
3. Click the **Advanced** button. The following window will be displayed.

4. Select the new COM port number from the **COM Port Number** list.

5. Click the **OK** button to change the COM port used by the Conversion Cable.
Using More than One Conversion Cable

The operating system recognizes USB-Serial Conversion Cables individually. If a second Conversion Cable is connected after the driver has been installed, driver installation will be requested again. Install the driver from the CD-ROM again.

If you do not own the CD-ROM and will use more than one Conversion Cable, copy the win2000_XP_Vista_7 folder from the CD-ROM to a folder on your hard disk, and select this folder.

Note: Use the following directory for Windows 98 or Me: **Win98_Me**

1. Copy the win2000_XP_Vista_7 folder from the CD-ROM to your hard disk (the CD-ROM is in the same package as the Conversion Cable).
2. The following window will be displayed. Select **Install from a list or specific location (Advanced)** and click the **Next** button.

3. Click the **Browse** button next to the **Include this location in the search** field, select the win2000_XP_Vista_7 folder copied from CD-ROM onto your hard disk, and click the **Next** button.
Revision History

A manual revision code appears as a suffix to the catalog number on the front cover of the manual.

Cat. No. W417-E1-04

The following table outlines the changes made to the manual during each revision. Page numbers refer to the previous version.

Terms and Conditions of Sale

1. Offer; Acceptance. These terms and conditions (these "Terms") are deemed part of any order for products, purchases, sales, lease or rental of products, or agreements for the performance of services. These Terms are made and accepted by Omron, as defined herein, for its Omron Companies subsidiaries, Omron Electronics LLC and its Omron Companies subsidiaries ("Omron"). Omron objects to any terms or conditions proposed in Buyer's purchase order or other documents which are inconsistent with, or in addition to, these Terms.

2. Prices; Payment Terms. All prices stated are current, subject to change without notice. Omron reserves the right to non-cancel a purchase order or decrease the prices on any unshipped portions of outstanding orders. Payments for Products are due net 30 days unless otherwise stated in the invoice.

3. Delivery. (a) If any applicable net amount of invoices sent to Buyer after deducting transportation charges, taxes and duties, and will be allowed only if (i) the invoice is paid according to Omron's payment terms and (ii) Buyer has no past due amounts.

4. Interest. Omron, at its option, may charge Buyer 1-1/2% interest per month or any other maximum legal rate, whichever is less, on any balance not paid within the stated terms.

5. Orders. Omron will accept no order less than $200 net billing.

6. Governmental Approvals. Buyer shall be responsible for, and shall bear all costs involved in, obtaining any government approvals required for the importation or sale of the Products.

7. Taxes. All taxes, duties and other governmental charges (other than general real property and income taxes), including any interest or penalties thereon, imposed directly or indirectly on Omron or required to be collected directly or indirectly by Omron for the manufacture, production, sale, delivery, importation, conversion or use of the Products sold hereunder (including customs duties and sales, excise, use, turnover and license taxes) shall be charged to and remitted by Buyer to Omron.

8. Financial. (a) If the financial position of Buyer at any time becomes unsatisfactory to Omron, Omron reserves the right to stop shipments or require satisfactory security. (b) Omron, at its option, may make payment on an invoice comply with these Terms or any related agreement. Omron may without liability and in addition to other remedies cancel any unshipped portion of Product(s) until Buyer pays all amounts, including amounts payable hereunder, whether or not then due, which Buyer owes to Omron, and may stop shipment of all Products until Buyer pays all amounts, including amounts payable hereunder, whether or not then due, which Buyer owes to Omron. Buyer shall in any event remain liable for all unpaid accounts.

9. Cancellation; Etc. Orders are subject to rescheduling or cancellation without notice.

10. Force Majeure. Omron shall not be liable for any delay or failure in delivery resulting from causes beyond its control, including but not limited to strikes, fires, floods, earthquakes, strikes or other labor disputes, shortage of labor or materials, accidents to machinery, acts of sabotage, riots, delay in or lack of transportation or the failure of any governmental authority.

11. Shipping; Delivery. Unless otherwise expressly agreed in writing by Omron:

   a. Shipments will be by a carrier selected by Omron; Omron will not drop ship any items in "break bulk" or other small quantities.

   b. Such carrier shall act as the agent of Buyer and delivery to such carrier shall constitute delivery to Buyer.

   c. All sales and shipments of Products shall be FOB shipping point (unless otherwise stated in writing by Omron), at which point title and risk of loss shall pass from Buyer to Omron; provided that Omron shall retain a security interest in the Products until the full purchase price is paid.

   d. Delivery and shipping dates are estimates only; and

   e. Omron will package Products as it deems proper for protection against normal handling and extra charges apply to special conditions.

12. Claims and Disputes. Buyer must file claims for shortages or damage to the Products occurring before delivery to the carrier must be presented in writing to Omron within ten (10) days of receipt of the Products by Buyer and must be accompanied by a copy of the carrier's transportation bill signed by the carrier noting that the carrier received the Products from Omron in the condition claimed.

13. Warranty; Limitations. Omron's exclusive warranty is that the Products will be free from defects in materials and workmanship for a period of twelve (12) months from the date of sale by Omron (or such other period expressed herein, "including without limitation"); and "Omron Companies" mean "Omron and its subsidiaries and affiliates). These Terms constitute the entire agreement between Omron and Buyer, and Buyer is purchasing the Products (without regard to conflict of law principles). No failure or delay by Omron in exercising any right under these Terms shall operate as a waiver.

14. Indemnities. Buyer shall indemnify and hold harmless Omron Companies and their employees from and against any claims or expenses based on infringement by the Products or otherwise of any intellectual property right, including litigation or proceeding (whether or not Omron is a party) which arises or is alleged to arise from the use of Products by Buyer, or from Buyer's acts or omissions under these Terms or in any way with respect to the Products. Without limiting the foregoing, Buyer (at its own expense) shall indemnify and hold harmless Omron Companies and its employees from and against any claims or expenses (including attorney's fees and expenses) related to any claim, investigation, litigation or proceeding (whether or not Omron is a party) which arises or is alleged to arise from Buyer's acts or omissions under these Terms or in any way with respect to the Products.

15. Property; Confidentiality. Any intellectual property in the Products is the exclusive property of Omron Companies and Buyer shall have no right to use the same, whether or not then due, which Buyer owes to Omron, and may stop shipment of all Products until Buyer pays all amounts, including amounts payable hereunder, whether or not then due, which Buyer owes to Omron. Buyer shall in any event remain liable for all unpaid accounts.

16. Export Controls. Buyer shall comply with all applicable laws, regulations and licenses (including export of products or information; or sale of products to "forbidden" or other proscribed persons; and (ii) disclosure to non-citizens of restricted technology or information).

17. Miscellaneous. (a) Waiver. No failure or delay by Omron in exercising any right or power set forth in these Terms shall operate as a waiver.

   (b) Assignment. Buyer may not assign its rights hereunder without Omron's written consent.

   (c) Law. These Terms are governed by the law of the jurisdiction of the home office of the Omron company from which Buyer is purchasing the Products, and this law shall govern and apply without regard to any conflict of law principles.

   (d) Amendment. These Terms constitute the entire agreement between Buyer and Omron and no term hereof shall be modified or altered unless in writing signed by the parties.

   (e) Severability. If any provision hereof is rendered invalid or ineffective, such provision shall not invalidate any other provision.

   (f) Severability. If any provision hereof is rendered invalid or ineffective, such provision shall not invalidate any other provision.

   (g) Definitions. Any use of the words "include", "including" or "such as" in these Terms (or similar words) mean Omron Corporation and any direct or indirect subsidiary or affiliate thereof.

Certain Precautions on Specifications and Use

1. Suitability of Use. Omron Companies shall not be responsible for conformity with any standards, codes or regulations which apply to the combination of the Product in the Buyer's application or use of the Product. At Buyer's request, Omron will provide applicable third party certification documents identifying requirements and limitations. Any application with the Product will require additional testing and, in some cases, an additional warranty. It is not sufficient for a complete determination of the suitability of the Product. Specifications are subject to change without prior notice for any reason, including but not limited to improvements and other reasons. It is the Buyer's responsibility to verify that the Product is suitable for the Buyer's application.

2. Programmed Products. Omron Companies shall not be responsible for the results obtained from the use of any programmed product, or the consequences thereof.

3. Performance Data. Data presented in Omron Company websites, catalogs and other materials is provided as a guide to the user in determining suitability and does not constitute a warranty. It may represent the result of Omron's test conditions, and the user must correlate it to actual application requirements.

4. Change in Specifications. Product specifications and accessories may be changed at any time based on improvements and other reasons. It is the Buyer's responsibility to change part numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the Product may be changed without any notice. When in doubt, special part numbers may be assigned to fix or establish key specifications for your application. Please contact Omron to confirm actual specifications of purchased Product.

5. Errors and Omissions. Information contained in this document has been checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical or proofreading errors or omissions.
